DETAILED ACTION

Allowable Subject Matter

1. Claims 10-17 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 10-17 are allowed since certain key features of the claimed invention are not taught or fairly suggested by prior art.

In claim 10, "a static memory, connecting to a scanning line connected to the first multiplexer and the demultiplexer, for storing the digital voltage signals stored in the demultiplexer; and a switch device, connected to the first multiplexer, the demultiplexer and a liquid crystal unit". The closest prior art Booth, Jr. et al. (6,731,306) teach a pixel circuit for liquid crystal display (figures 5-6) having a lower power consumption, and the circuit comprising plurality multiplexer (multipliers); Hudson et al. (6,005,558) teach pixel electrode, a storage element (SRAM) for storing a data bit, and multiplexer, however, singularly or in combination with other prior art, fail to anticipate or render the above underlined limitations obvious.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
